

How much does a 12-core multimode optical cable cost

Article Overview

A 12-core multimode OM4 fiber optic cable typically costs between \$0.50 and \$1.00 per foot, with pre-terminated assemblies or specialty jackets increasing the price.

Retail and Wholesale Pricing

For standard OM4 12-core multimode fiber, retail prices generally range from \$0.50 to \$1.00 per foot depending on jacket type, plenum rating, and manufacturer specifications (e.g., Fiber By the Foot offers plenum-rated 12-strand OM4 cables suitable for 100G data at this range) . Wholesale bulk purchases may reduce the per-foot cost to \$0.30-\$0.50 . Pre-terminated or pigtail assemblies, such as 1.5-meter SC/UPC multimode cables, are typically more expensive due to factory termination and connectorization .

Factors Affecting Cost

- **Cable Type and Rating:** Plenum-rated cables for indoor air-handling spaces cost more than standard riser-rated cables. Armored or indoor/outdoor cables also increase the price .
- **Fiber Count:** Higher strand counts increase cost proportionally; a 12-strand cable is mid-range compared to 24- or 48-strand cables .
- **Installation Environment:** Indoor runs are cheaper than underground or aerial installations, which require additional conduit, trenching, or protective ducting .
- **Connectorization:** Pre-terminated cables with MPO/MTP or SC/UPC connectors add to the cost, especially for high-speed applications like 100GBASE-SR4
