

How much does a complete set of indoor high and low voltage electrical equipment cost

Article Overview

Indoor high and low voltage electrical equipment sets typically range from \$10,000 to over \$250,000 depending on voltage, capacity, and configuration.

High Voltage (HV) Indoor Equipment

High voltage indoor equipment, such as switchgear and transformers, is used in transmission networks, substations, and large industrial facilities. Prices vary widely based on voltage rating (commonly 11kV, 22kV, or 33kV), insulation type (air-insulated or gas-insulated), and capacity. Gas-insulated switchgear (GIS) is more compact and reliable but generally more expensive than air-insulated systems. On platforms like Alibaba, HV indoor switchgear sets can start around \$15,000–\$50,000 for smaller units, with larger or customized systems exceeding \$100,000 depending on specifications and certifications .

Medium and Low Voltage (MV & LV) Equipment

Medium voltage (1–36 kV) switchgear and low voltage (
