

How much does a type A distribution box cost

Article Overview

A Type A distribution box typically costs between \$200 and \$2,000, depending on materials, capacity, and included components.

Price Range and Factors

The cost of a Type A distribution box varies widely based on several factors:

- Material of the enclosure: Plastic units are the most economical, while powder-coated steel or stainless steel boxes are more durable and expensive .
- Internal components: Boxes sold empty are cheaper, but adding circuit breakers, surge protectors, and busbars increases the price significantly .
- Capacity and voltage rating: Single-phase residential boxes are generally less expensive than three-phase commercial or industrial units .
- Ingress Protection (IP) rating: Higher IP ratings for water and dust resistance, such as IP65 or above, increase costs .
- Installation costs: Professional installation for a standard residential box can range from \$1,300 to \$1,800, while industrial setups may require weeks of labor and additional permit fees .

Typical Cost Examples

- Small residential plastic box: Around \$200-\$400
- Standard residential steel box with basic breakers: \$500-\$1,000...
