

How much does an optical fiber ferrule cost

Article Overview

Optical fiber ferrule prices vary widely depending on material, size, type, and quantity, with options ranging from a few cents per piece for bulk ceramic ferrules to several dollars for precision stainless steel or specialized ferrules.

Pricing by Material and Type

- **Ceramic (Zirconia) Ferrules:** Commonly used for single-mode and multimode fibers, these ferrules are durable, non-magnetic, and suitable for high-precision applications. Prices typically range from \$0.50 to \$3 per ferrule depending on bore diameter and pack size (e.g., packs of 10) as offered by suppliers like Thorlabs and OZ Optics .
- **Stainless Steel Ferrules:** Often used in rugged or optogenetics applications, stainless steel ferrules can be scored for better bonding. Prices are generally \$1 to \$5 per ferrule, with variations based on diameter (1.25 mm LC or 2.5 mm FC/SC/ST) and whether they include flanges or extended lengths .
- **Glass or Fiber Capillary Ferrules:** Available from Chinese manufacturers, these ferrules are cost-effective for bulk orders, with prices starting as low as \$0.10 to \$0.50 per piece for large quantities .

Connector Compatibility

Ferrules are sold to match standard fiber connectors:

- **LC Ferrules (Ø1.25 mm):** Compatible with LC/PC components and mating sleeves....
