

How to calculate the price of optical fiber cable listing

Article Overview

The actual price of optical fiber cable is calculated by combining the material cost per foot or meter with installation, labor, permits, accessories, and any project-specific factors.

Step 1: Determine Material Costs

The base cost of fiber optic cable depends on fiber type, strand count, and construction:

- Single-mode fiber (OS2): \$0.09–\$1.52 per foot, cheaper per foot but requires more expensive equipment .
- Multimode fiber (OM3/OM4): \$1–\$6 per foot, commonly used in data centers .
- Strand count: Higher strand counts increase cost proportionally (e.g., 12-strand ≈ \$0.50/ft, 24-strand ≈ \$1.00/ft), .
- Cable construction: Armored cables for harsh environments or direct burial cost \$0.50–\$5 per foot, while indoor riser-rated cables are cheaper .
- Jacket material and environmental rating: Outdoor PE or UV-resistant jackets cost more than indoor PVC or LSZH jackets .

Step 2: Include Installation and Labor Costs

Installation costs vary by method and complexity:...
