

How to connect home fiber optic cable to the control panel

Article Overview

To connect a home fiber optic cable to your control panel, you typically route the fiber to an Optical Network Terminal (ONT) near the panel, then link it to your router using an Ethernet cable.

Step 1: Gather Necessary Equipment

You will need:

- Fiber optic cable (single-mode or multi-mode depending on your ISP)
- Optical Network Terminal (ONT) provided by your ISP
- Ethernet cable (Cat6 or better) to connect the ONT to your router
- Optional surge protection or UPS for the ONT
- Safety gear such as gloves and safety glasses when handling fiber cables

Step 2: Locate the Fiber Entry Point

Identify where the fiber enters your home, usually through a Network Interface Device (NID) or a small box outside your home. The fiber is then routed to the control panel or nearby wall location where the ONT will be installed .

Step 3: Install the ONT

- Mount the ONT near your electrical panel or designated area....
