

How to connect the router s fiber optic port

Article Overview

To connect a router to a fiber optic port, you need an Optical Network Terminal (ONT) to convert the fiber signal, then link it to your router via an Ethernet cable.

Required Equipment

- Optical Network Terminal (ONT): Converts the incoming fiber optic light signal into an electrical signal your router can use, usually provided by your ISP .
- Fiber optic cable: Typically single-mode with SC/APC or SC/UPC connectors .
- Router: Ensure it supports fiber connections, either via a WAN port or SFP slot .
- Ethernet cable (Cat6a or higher): Connects the ONT to the router to maintain high-speed performance .

Step-by-Step Connection

- Install the ONT
- Locate the fiber optic wall outlet where your ISP's fiber line enters your home.
- Connect the fiber optic cable from the wall outlet to the ONT's optical port, handling the connector carefully to avoid dirt or damage .
- Power on the ONT and wait for the status lights to stabilize (usually 2-5 minutes), .
- Connect the ONT to the Router
- Use an Ethernet cable to connect the ONT's LAN/Ethernet port to your router's WAN or Internet port .
- Power on the router and wait for the indicator lights to confirm a successful conne...
