

How to hang cable indicator signs inside cable trays

Article Overview

Cable indicator signs should be securely attached inside cable trays using non-intrusive fasteners, clearly labeled, and positioned for visibility without obstructing cable routing or airflow.

Preparation and Planning

Before installing indicator signs, survey the cable tray layout and determine the locations where signs are needed for identification, maintenance, or safety purposes. Plan the placement to avoid interference with cable bends, supports, or high-voltage lines, and ensure compliance with local electrical codes and standards such as NEC Article 392 or IEC 61537 .

Selecting the Right Signage and Fasteners

- Use durable, non-conductive materials for signs, such as laminated plastic or PVC, to prevent electrical hazards.
- Choose fasteners compatible with the tray type: cable ties, stainless steel clips, or small brackets work well for ladder, perforated, or solid-bottom trays .
- Ensure the fasteners do not compress or damage cables and allow for thermal expansion or movement.

Installation Techniques

- Positioning: Place signs at eye level or at clearly visible points along the tray run....
