

How to install a butterfly-shaped optical cable reel

Article Overview

Installing a butterfly-shaped optical cable reel requires careful handling of the reel, proper securing to a surface, and controlled deployment of the flat ribbon fiber to prevent damage and signal loss.

Step 1: Prepare the Reel

- Remove the reel from its shipping box by cutting and discarding foam spacers and lifting the reel using a two-person lift through the triangular openings in the side plates .
- Remove any shipping bolts securing the reel to the wooden plate, taking care not to lay the reel on the FORJ connector exit side .
- Inspect the reel and cable for any physical damage before installation .

Step 2: Secure the Reel

- Mount the reel to a solid surface using at least four M8 or 5/16" bolts. You can secure it from the top using the 8.4mm diameter holes in the chassis cross angles or from the bottom using the tapped holes .
- Ensure the reel is stable and cannot tip over during cable deployment.

Step 3: Connect the Cable

- Connect the deployment cable to the non-rotating connectors on the reel's side or...
