

How to make a large bend in a cable tray

Article Overview

Large cable tray bends typically start around \$0.80 per unit for bulk stainless steel options, with prices varying based on material, size, and type.

Pricing Overview

- **Bulk Stainless Steel Bends:** On platforms like Alibaba, bend cable trays in bulk start at approximately \$0.80 per unit with a minimum order of 10 units. These include 90-degree elbows and wire mesh trunking suitable for large-scale installations .
- **Material and Type Impact:** Prices vary depending on whether the bend is made from carbon steel, aluminum, stainless steel, or fiberglass. Ladder-type bends for heavy-duty applications are generally more expensive than wire mesh or trough types due to their robust construction .
- **Specialized Systems:** Products like Cablobend EZ offer adjustable mesh tray bends with vertical and horizontal flexibility up to 90°, available in multiple widths (6" to 24") and heights (2" to 6"). These pre-assembled systems reduce installation time and may cost more upfront but save labor costs in large projects .
- **Fittings and Kits:** Standard 90° junction kits from suppliers like Platt Electric Supply include hardware for tees and bends, with finishes such as electroplated zinc or brushed stainless steel. Prices for these kits depend on tray width and material, typically ranging from \$20 to \$100 per kit for industrial sizes .

Factors Affecting Cost

- **Tray Width and Height:** Larger trays (12"-24") require more material, increasing the price.
- **Material:** Stainless steel and aluminum are more expensive than carbon steel or fi...
