

How to sell aluminum alloy cable trays

Article Overview

You can sell aluminum alloy cable trays by targeting scrap yards, specialized non-ferrous metal buyers, or industrial surplus markets, ensuring the trays are clean, sorted, and properly valued.

Understand Your Product

Aluminum alloy cable trays are lightweight, corrosion-resistant, and high-strength systems used for organizing electrical and data cables in industrial, commercial, and outdoor environments . Their value comes not only from the aluminum content but also from their structural quality and potential for reuse in construction or industrial projects .

Prepare the Trays for Sale

- Clean and Sort: Remove any contaminants such as plastic, paint, or other metals to maximize resale value .
- Separate by Type: If you have different tray designs (ladder, perforated, solid-bottom), sort them to help buyers assess usability and pricing .
- Measure and Weigh: Scrap yards and metal buyers often pay by weight, so having accurate measurements ensures fair compensation .

Identify Potential Buyers

- Local Scrap Yards and Recycling Centers: These are the most accessible options. They pay based on aluminum weight and may offer immediate cash .
- Specialized Non-Ferrous Metal Buyers: Companies like R.A.R Industries purchase aluminum and other alloys in bulk, often handling removal and offering competitive...
