

How to set up a wireless network on a TP-Link router with fiber optic internet

Article Overview

You can set up a TP-Link router with fiber optic internet by connecting it to your ONT, configuring the WAN settings, and securing your Wi-Fi network.

Step 1: Prepare Your Equipment

- Optical Network Terminal (ONT): Most fiber connections require an ONT provided by your ISP, which converts the fiber signal into Ethernet.
- TP-Link Router: Ensure your router has a WAN port compatible with Ethernet input.
- Cables: Fiber optic cable for the ONT and an Ethernet cable to connect the ONT to the router.
- Computer or mobile device: For accessing the router's web interface or TP-Link Tether app .

Step 2: Connect the Hardware

- Plug the fiber optic cable into the wall outlet and then into the ONT.
- Power on the ONT and wait 2–5 minutes for the status lights to stabilize .
- Use an Ethernet cable to connect the ONT's LAN port to the WAN port on your TP-Link router .
- Connect the router to power and turn it on.

Step 3: Access the Router Interface

- Open a web browser and enter the router's default IP address (usually 192.168.0....
