

How to use the fiber optic cable hanging and fixing clip

Article Overview

Fiber optic cable hanging and fixing clips secure and protect cables during aerial or suspended installations, preventing damage and maintaining proper alignment.

Purpose of Fiber Optic Cable Clips

Fiber optic cable clips are designed to support, stabilize, and protect fiber optic cables in various environments, including outdoor aerial deployments, indoor ceilings, and data centers. They prevent the cable from moving, reduce mechanical stress, and protect against environmental factors like wind, vibration, and moisture (FiberCheap), .

Types of Clips

- **Suspension Clamps:** Used for aerial cables on poles or towers; they hold the cable without crimping it and are suitable for ADSS or mini ADSS cables (Jera line), .
- **D-Ring Clamps:** Hook around the cable and lock with a screw or bolt; ideal for suspended indoor installations (FiberCheap), .
- **Wall-Mount and Surface-Mount Clamps:** Attach directly to walls, floors, or racks to organize and secure cables in confined spaces (FiberCheap), .
- **T-Clamps:** Used outdoors on poles or brackets where wind and vibration are significant (FiberCheap), .
