

Huijue Fiber Optic Switch Storage Configuration

Article Overview

Configuring a Huijue Fiber Optic Storage Switch involves setting up system management, VLANs, IP routing, security, and energy storage integration using standard network switch practices.

System Management

Start by accessing the switch via console, Telnet, or SSH. Configure basic system parameters such as:

- Hostname and management IP for network identification.
- User accounts and privileges to control access.
- Time and timezone settings for accurate logging and scheduling.
- Firmware and license management to ensure the switch operates with full features and security updates .

Interface and VLAN Configuration

- Ethernet Interfaces: Assign IP addresses to Layer 3 interfaces if routing is required.
- VLANs: Create VLANs to segment network traffic. Configure voice VLANs if supporting VoIP devices.
- VLAN Mapping and Classification: Map VLANs across ports and classify traffic for QoS or security purposes.
- Link Aggregation: Combine multiple physical ports into a single logical link for red...
