

Hungarian MU connectors high temperature resistant directly supplied by manufacturer

Article Overview

High-performance MU connectors suitable for high-temperature applications can be sourced from Hungarian manufacturers like Scintilla, with options for direct supply and custom production.

MU Connector Options

Corning 727 series MU connectors offer a small-form-factor design with impact-resistant, nonflammable polymer housings, push-pull operation, and high repeatability, suitable for demanding environments . These connectors are available with zirconia or metal sleeves in simplex or duplex configurations, providing durability and thermal stability for high-temperature applications . Eaton MU series connectors are highly ruggedized, featuring 316L stainless steel shells, O-ring sealing, and resistance to corrosion, vibration, and shocks. These connectors are designed for extreme conditions, including high-pressure and high-temperature environments, making them suitable for industrial and marine applications .

Hungarian Manufacturer: Scintilla

Scintilla, based in Hungary, operates three production sites in Jászberény, Zalaegerszeg, and Hajdúböszörmény, offering:...
