

Installation of Fiber Optic Terminal Box in Cameroon

Article Overview

Fiber optic terminal boxes in Cameroon are installed for FTTH/FTTx networks using wall or pole mounting, with local providers like ROOT IT and AFOSE WORKS Plc offering full deployment services.

Overview of Fiber Optic Terminal Boxes

Fiber optic terminal boxes, also called fiber distribution boxes (FDB) or optical distribution frames (ODF), serve as the termination point for feeder cables and connection to drop cables in FTTx networks. They are designed to protect, manage, and organize optical fibers, allowing for splicing, splitting, and distribution. Common types include 8-core, 16-core, and up to 24-core boxes, suitable for small to medium-scale deployments in apartments, residential, or commercial buildings .

Key Features

- Mounting Options: Wall-mounted or utility pole installation.
- Protection: Waterproof covers and IP65-rated enclosures ensure durability in outdoor conditions .
- Capacity: Supports multiple subscribers, typically 8-16 fibers per box, with options for expansion.
- Functionality: Integrates fiber splicing, splitting, storage, and cable connection in one unit
