

Installation of power cable trays in Uzbekistan

Article Overview

Power cable trays in Uzbekistan can be installed using metal support systems from local suppliers like AYSU HVAC SYSTEMS and Mirankul Group, offering durable, corrosion-resistant trays with full installation support.

Types of Cable Trays

In Uzbekistan, the main types of metal cable trays available include:

- Ladder trays: Ideal for main power lines with large cross-sections in industrial facilities and mines, providing high load capacity and ventilation for cables .
- Perforated trays: Suitable for general power and low-current networks, allowing easy cable fastening and airflow .
- C and U-type trays: Used for routing cables in tight spaces or along walls and ceilings . These trays are typically made from galvanized steel using the Sendzimir method for indoor use or hot-dip galvanizing for outdoor and aggressive environments, ensuring long-term corrosion protection . Powder coating in any RAL color is also available for aesthetic or open interior applications.

Installation Considerations

- Load capacity: Tray designs include stiffening ribs and locked profiles to withstand heavy cable loads, with metal thickness ranging from 0.7 to 2.0 mm .
- Ease of installation: A wide selection of fittings (90° bends, dividers, transitions) al...
