

Integrated Structured Cabling System

Overview

Structured cabling is the nervous system of a facility's or campus's integrated safety and security systems. It's an organized and standardized system of cables, connectors, and hardware that links all devices and systems, allowing them to communicate efficiently and reliably. Integrated Cabling Systems LLC offers design, build, & support services for your technology needs. Our team members have over 20 years of experience integrating technologies in the following markets:. Belden understands the unique demands placed on data centers and offers a complete portfolio of future-oriented cabling and connectivity solutions designed to ensure fast, reliable transmission of ever-increasing amounts of data.
