

Intelligent Selection Guide for Campus Network-Grade Independent Switches

Overview

The HPE Aruba Networking Campus Reference Architectures section describes how to select compatible products to design campus networks of varying scale. If DHCP OFFERS are seen coming from any untrusted port, they are dropped. L2 device only – connecting end users! L2 device only – connecting edge switches! Fibre to building distribution, or is copper enough?

But would you be. These materials are licensed under the Creative Commons Attribution-NonCommercial 4.0 International license (Core selection). An organization can also choose the Cisco Embedded Wireless Controller on Cisco Catalyst 9100 Series APs, for Cisco Catalyst controller features without a dedicated appliance. Cisco Catalyst 9800 Series wireless controllers are built on the three pillars of network excellence—always on, secure, and. This chapter describes the Layer 2 and Layer 3 technologies used to design and build an HPE Aruba Networking campus topology. High availability is the primary goal for any enterprise conducting business on an ongoing basis. Layer 2 loops cause catastrophic network disruptions, making prevention and.
