

Is the bedroom network port connected to fiber optic or a router

Overview

The ONT connects directly to the fiber-optic line from your internet service provider, converting light signals into a usable internet connection. A router works with your ONT or modem to distribute internet access across your business network and manage traffic between devices. The good news is that once you're set up with an ONT, you're good to go for the future—you can simply plug any wireless router you like into its Ethernet port to set up a wireless fiber home network. Most internet providers install the ONT during professional installation, mounting it either inside your. An Optical Network Terminal (ONT) links your home to fiber-optic internet. The technician powers, tests, and.
