Min	57.2	47.3	44.15	115.9	13.3	13.6	11.9	8.4	9.9	44.65

Overview

Most SFP fiber optic modules use LC connectors, while SC connectors are mainly found in legacy networks and MPO/MTP connectors are used for high-density cabling rather than directly on standard SFP modules. “OFC connector type” is often used informally to mean optical fiber connector type and typically refers to LC, SC, ST, FC, MPO/MTP and others—choose based on device interface and optical budget. This connector landscape reflects how modern SFP deployments prioritize port density and. While the small size of fibre optic connectors does not mean they play a minor role, the type of connector you use affects the overall efficiency of light transmission across the fibre network. Review Corning's LC/SC assembly specification. If you are upgrading a network switch or deploying fiber to the home (FTTH), you will inevitably face the connector choice: LC vs SC. Choosing the wrong one can lead to costly restocking fees or project delays.
