

Ladder Cable Tray Quotation

Article Overview

Ladder-type cable trays are available in various materials, sizes, and load capacities, with quotations typically based on tray dimensions, material, finish, and accessories.

Key Features and Specifications

Ladder-type cable trays consist of two parallel side rails connected by transverse rungs, providing strong support for power and control cables while allowing free airflow to prevent overheating. They are suitable for long spans, heavy-duty applications, and large-diameter cables. Standard materials include galvanized steel, aluminum, stainless steel (304/316), and fiberglass, with finishes such as hot-dip galvanized, powder-coated, or anodized aluminum for corrosion resistance and aesthetic requirements. Typical dimensions and capacities:

- Widths: 150-600 mm
- Heights: 65 mm standard
- Cable laying depth: 44 mm
- Load capacities: 30-90 kg/m
- Support spans: up to 6 meters depending on material and load

Accessories and Installation

A complete ladder tray system includes fittings (elbows, tees, crosses, risers), splice plates, clamps, fasteners, and covers. Installation can be overhead, underfloor, or along walls using cantilever brackets, trapeze supports, or floor stands. Proper spacing and support selection are critical to meet load and deflection requirements...
