

Length width and height of household electrical distribution box

Article Overview

Standard residential electrical distribution boxes typically range from 12-24 inches in height, 8-18 inches in width, and 4-6 inches in depth, depending on type and capacity.

Standard Wall-Mount Device Boxes

For single-gang wall-mounted boxes used for switches or outlets, the typical dimensions are approximately 2.25 inches wide × 3.75 inches high, with a depth ranging from 2.5 to 3.5 inches depending on wire volume requirements and device type (e.g., GFCI or smart switches) . Multi-gang boxes increase in width proportionally to accommodate additional devices, while depth is often increased to meet NEC wire-fill standards .

Junction Boxes

Junction boxes, used for wire splices or ceiling-mounted fixtures, commonly measure 4 inches × 4 inches in footprint, with multiple depth options ranging from 1.5 to 3.5 inches. Round or octagon boxes for ceiling fans or smoke detectors may have specialized depths, such as 2-1/8 inches for fan-rated boxes to support dynamic loads .
