

Manufacturer EDFA100G

Overview

Thorlabs' core-pumped erbium-doped fiber amplifiers (EDFAs) provide high small signal gains and output powers in a compact, turnkey benchtop package or a plug-in PXIe module with FC/APC (2.0 mm narrow key) input and output connectors. 5. The EDFAMUX enables a straightforward upgrade from 10G to 100G DWDM networks, extending reach up to 80 km. When paired with our QSFP28. We specialize in producing high-quality Erbium-Doped Fiber Amplifiers (EDFAs) with cost-effective volume production capabilities. The power of a data transmitter may be boosted with a high-power EDFA before entering a long fiber span, or a device with large losses, such as. The EDFAs feature high output power, high gain with very low noise, and they can be customized to accommodate a wide range of input signal levels. We recommend Quantifi Photonics optical instruments are r-calibrated every 12 months.
