

Mexico Integrated Power Cabinet Manufacturing Plant

Article Overview

Mexico hosts several state-of-the-art integrated power cabinet manufacturing facilities, serving utilities, data centers, and energy storage markets with advanced production capabilities.

Key Manufacturers and Facilities

Howard Industries is investing approximately \$100 million in a new facility in Mexico, spanning 825,000 square feet. This plant will focus on large three-phase distribution transformers (750–10,000 kVA) for utilities, data centers, and Battery Energy Storage Systems (BESS), employing over 600 people and featuring advanced manufacturing and testing technology to support grid expansion and renewable energy integration . POWERGY, based in Mexico City, specializes in high-quality DC power systems, custom racks, and indoor/outdoor cabinets for telecommunications and data centers. Their facility provides full system integration services, including consultation, configuration, assembly, testing, and delivery of fully integrated power plants. POWERGY emphasizes precision manufacturing, rigorous testing, and rapid delivery of tailored solutions . Spellman de Mexico, located in Matamoros, Tamaulipas, operates two main plants with a combined area exceeding 288,000 square feet. The facility produces high-voltage assemblies, transformers, PCBs, and sub-assemblies, employing approximately 900 skilled technicians. Spellman integrates Lean Manufacturing and Six Sigma techniques, ensuring high-quality production and on-time delivery for global markets . EK SOLAR and other Mexican energy storage cabinet manufacturers focus on turnkey solutions for solar farms, industrial backup,...
