

Multimode fiber pre-termination

Overview

Pre-termination of fiber optic cable assemblies is a helpful and versatile way to simplify the network infrastructure deployment, especially in multi-mode applications. These assemblies are easy to use, quick to install, and allow for reduced on-site terminations, decreasing error. Pre-terminated fiber cables have become a cornerstone of this transformation, offering pre-installed connectors that accelerate deployment and enhance reliability. Choose from a wide selection of patch cords, and take advantage of our OPT-X™ Unity Ultra Low Loss assemblies to future proof your critical networks. Eliminate time-consuming, labor-intensive field termination with pre-terminated fiber assemblies. Available with a choice of LC, SC & ST connections as CTS armoured, Loose tube & Tight Buffer variants with 4, 8, 12, or 24 cores OM4 Tight Buffered.
