

National Fiber Optic Patch Cord Types

Article Overview

Fiber optic patch cords are available in single-mode and multimode types with a variety of connectors such as LC, SC, FC, ST, and MPO, designed for high-speed network applications from 1G to 800G.

Overview of Fiber Optic Patch Cords

Fiber optic patch cords, also called fiber jumpers or patch cables, are short, flexible optical cables with connectors on both ends, used to interconnect devices within a network, such as servers, switches, and patch panels . They are essential for maintaining low-loss, high-performance connections in data centers, enterprise networks, and telecommunications infrastructure .

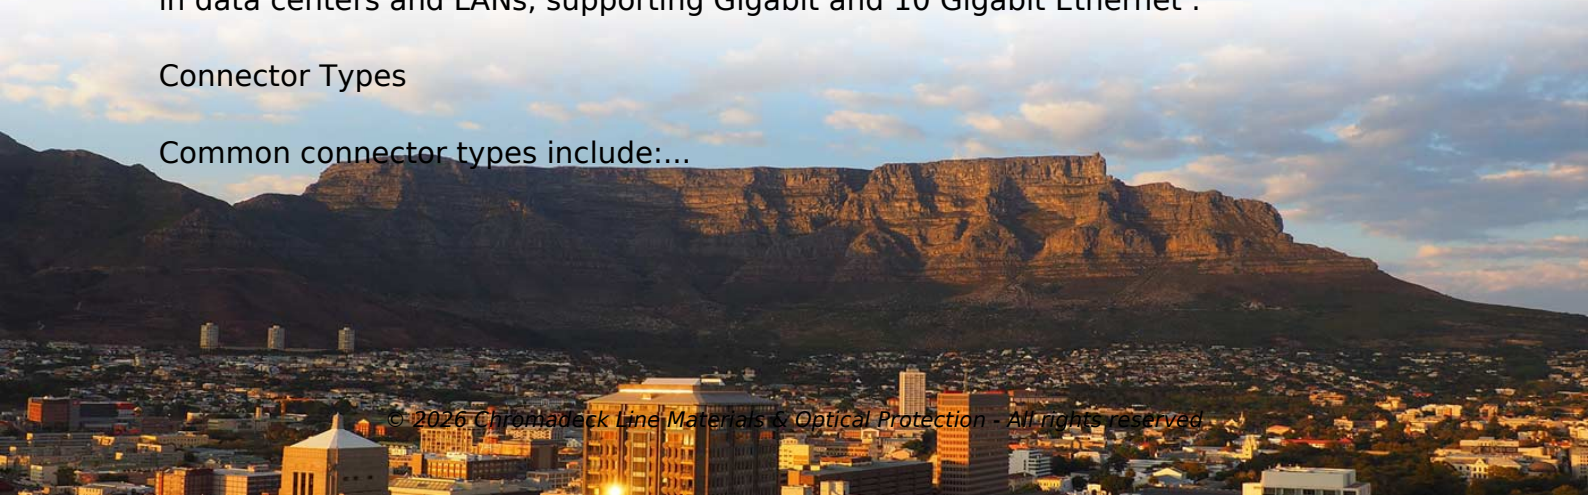

Fiber Types

Patch cords are categorized by fiber type to match network requirements:

- Single-mode (OS2): Optimized for long-distance, high-speed transmission, supporting up to 400G/800G .
- Multimode (OM2, OM3, OM4, OM5): Suitable for shorter distances, commonly used in data centers and LANs, supporting Gigabit and 10 Gigabit Ethernet .

Connector Types

Common connector types include:...
