

Nicaragua Analysis Report

Overview

A 2026 assessment of Nicaragua's economy, examining growth prospects, political risk, sanctions impact, inflation trends, and implications for regional stability. The Nicaraguan economy weathered well multiple shocks since 2018, supported by appropriate macroeconomic and financial policies, substantial pre-2018 buffers (gross international reserves and central government deposits), and financing from international financial institutions (IFIs) during the. During the previous reporting period, the ruling Sandinista National Liberation Front (FSLN) consolidated a police state. Having eliminated all political opposition, the FSLN has spent the past two years laying the groundwork for an eventual transfer of power from President Daniel Ortega to his. Under Article IV of the IMF's Articles of Agreement, the IMF holds bilateral discussions with members, usually every year. In the context of the 2025 Article IV consultation with Nicaragua, the following documents have been released and are included in this package: A Press Release. Growth is supported primarily by remittance inflows, agriculture, and limited industrial activity, while domestic demand remains subdued following a series of global and regional shocks. Second (2021): intensified targeted repression to phase ensure the re-election of Daniel Ortega as President. current phase. Nicaragua's economy grew by 4.
