

Optical Cable Made by Huawei

✓ 50KW/100KWH

✓ HIGHER POWER OUTPUT
IN OFF-GRID MODE

✓ CONVENIENT OPERATION
& MAINTENANCE

✓ PRE-WIRED

Article Overview

Huawei develops advanced optical cables, including hybrid copper-fiber cables, active optical cables (AOC), and submarine cables, enabling high-speed, long-distance, and flexible network deployment.

Hybrid Copper-Fiber Cables

Huawei's hybrid optical-electrical cables combine optical fibers with copper wires in a single cable, allowing simultaneous data transmission and Power over Ethernet (PoE) delivery. These cables overcome the 100-meter Ethernet limit, supporting ultra-long-distance PoE++ power supply up to 300 meters and 10Gbps data rates. They are lightweight, flexible, and easy to deploy without extensive site surveys. Huawei offers multiple versions:

- V1.0: Optical fibers and copper separated at termination.
- V1.5: Mixed separation and integration for specific scenarios.
- V2.0: Fully integrated fibers and copper, recommended for most deployments.

Active Optical Cables (AOC)

Huawei's AOC cables integrate optical modules and fibers for high-speed data center interconnections. Common models include SFP+, SFP28, QSFP+, and QSFP28, supporting connections between servers, switches, and storage devices. These cables reduce power consumption, simplify installation, and meet the growing bandwidth demands of cloud computing and data centers ...
