

Outdoor Optical Cable Finished Products

Article Overview

Outdoor optical cable finished products are factory-terminated, weatherproof fiber optic cables designed for reliable performance in harsh outdoor environments.

Overview

Outdoor optical cables are engineered to withstand extreme environmental conditions, including temperature fluctuations, UV exposure, strong winds, water, and corrosion. They are commonly used in aerial, underground, and pipeline installations, as well as in FTTH, FTTx, and backbone networks . These cables often feature a loose buffer design and thick protective coatings to ensure durability and long-term reliability .

Types of Outdoor Optical Cables

- **Armored and Non-Armored Cables:** Armored cables provide extra protection against mechanical damage, while non-armored cables are lighter and easier to handle .
- **Self-Supporting Aerial Cables:** These cables do not require additional messenger wires and can be suspended between poles or pylons .
- **Duct and Microduct Cables:** Designed for installation inside protective conduits, microducts allow multiple smaller cables to be installed efficiently .

Finished Products and Assemblies

Factory-terminated outdoor optical cables come as finished products with connectors pre-installed, ensuring high performance and faster deployment. These include:...
