

Papua New Guinea Maintenance and Repair Fiber Optic Cable Splice Box 2 Cores

Article Overview

Qualified fiber optic contractors in Papua New Guinea, such as Cetelnet, SBS, and East Coast NetLink, provide professional maintenance, repair, and splicing services for 2-core fiber optic cable splice boxes.

Key Service Providers

Cetelnet is a leading fiber optic contractor in PNG, offering end-to-end services including network design, installation, fusion splicing, and 24/7 maintenance and fault repair. Their technicians are certified to international standards and equipped with precision tools to ensure low-loss fiber connections, making them suitable for maintaining and repairing 2-core splice boxes in both urban and remote areas of PNG . SBS provides specialized contracting services with a focus on structured cabling systems, including fiber optic networks. They offer installation, testing, commissioning, and ongoing maintenance, supported by licensed tradesmen and calibrated testing instruments. SBS can handle day-to-day maintenance, emergency repairs, and fault analysis for fiber optic splice boxes, ensuring compliance with PNG and AS/NZS standards . East Coast NetLink delivers fiber optic connectivity solutions for businesses and government agencies, including high-speed data transmission and secure network services. They provide customized maintenance and repair plans for fiber optic infrastructure, including splice boxes, and can support both corporate and remote installations
