

Price List for Intelligent Core Switches for Data Center Interconnection

Article Overview

Intelligent core switches for data center interconnection range widely in price depending on vendor, port density, speed, and features, with options from FS, HPE, Cisco, Huawei, and Ruijie available for direct inquiry.

Overview of Core Switch Options

FS offers flexible 10/25/40/100/200/400GbE data center switches suitable for large enterprises and cloud providers, with both fixed and modular chassis options for scalable deployments . HPE Networking provides the Comware 12900E modular series, supporting 1-16 slot chassis with 1GbE to 400GbE connectivity, designed for virtualized and cloud-ready data centers. The FlexFabric 5980 series offers low-latency 10GbE top-of-rack switches with 100Gbps uplinks, while the 5900 series provides high-density, low-latency access-layer switches . Cisco Nexus switches cover a wide range from 1G to 400G, with modular and fixed designs optimized for spine-leaf, top-of-rack, and AI-ready 800G infrastructures. They include FPGA-based programmable NICs, low-latency designs, and advanced telemetry for high-performance data centers . Huawei CloudEngine 16800 and Ruijie RG-N18010-XH offer ultra-high-density solutions with up to 288 x 100GE ports and 1152 x 100GE ports respectively, suitable for hyperscale cloud and enterprise data centers . Accio highlights next-generation high-speed switches with 100Gbps uplinks, AI/ML workload optimization, P4 programmability, and open networking options, emphasizing total cost of ownership (TCO) considerations including power, cooling, optics, and licensing
