

Price list for fiber optic cable laying

Overview

Whether you need singlemode, armored, or indoor plenum, this guide gives you the exact cost per foot of fiber optic cable — including installation — so you can budget without guesswork. Data aggregated from Q1 2026 contractor invoices across Texas, Ohio, and North Carolina. The main cost drivers include material type, run length, trenching or aerial work, and any required permits or inspections. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. Whether you're running fiber to a home or a data center, here's exactly what contractors are charging in 2026. A short residential drop under 1,000 ft may cost \$3,000-\$8,000, while longer runs to an attached garage or street node can run \$8,000-\$25,000.
