

Price of 24-core self-supporting optical cable

LoRawan outdoor base station

Article Overview

The price of a 24-core self-supporting optical cable typically ranges from \$1.50 to \$6.00 per meter, depending on fiber type, construction, and environmental features.

Price Range and Factors

The cost of a 24-core self-supporting fiber optic cable varies significantly based on several factors:

- **Fiber Type:** Single-mode fibers (SMF) are generally more expensive than multimode fibers (MMF) due to their long-distance transmission capabilities and lower attenuation, making them suitable for telecom and high-speed networks .
- **Cable Construction:** Loose-tube, armored, and aerial designs increase the price due to enhanced mechanical protection, water-blocking systems, and self-supporting features . Tight-buffered or indoor cables are less expensive.
- **Environmental Protection:** Outdoor cables with polyethylene (PE) jackets, corrugated steel tape armor, or anti-tracking (AT) sheaths for high-voltage areas cost more due to durability and safety requirements .
- **Brand and Quality:** Premium brands like Corning, YOFC, or Fujikura may charge higher prices for better bending radius, hydrolysis resistance, and long-term reliability .
