

Price of 4-core fiber optic fusion splice box

Article Overview

A 4-core fiber optic fusion splice box typically costs between \$15 and \$50, depending on material, brand, and features.

Price Overview

- Basic plastic indoor/outdoor boxes suitable for FTTH applications generally range from \$15 to \$30. These often include 4 SC/APC adapter ports, a fusion splice tray, and space for cable management (Amazon, TopFiberBox) .
- Metal or more durable enclosures with wall-mounting capability and support for SC, LC, or E2000 adapters can cost \$30 to \$50 or more, depending on the manufacturer and additional features like weatherproofing or multiple entry points (Atel Electronics) .
- Higher-end or specialized splice closures designed for outdoor or industrial use, with gel sealing or higher splice capacity, may exceed this range, but for a standard 4-core box, the typical retail cost remains under \$50 (FiberOptic Supply) .

Factors Affecting Cost

- Material: ABS plastic boxes are cheaper, while metal enclosures are more durable and slightly more expensive.
- Indoor vs. Outdoor Use: Weatherproof boxes for outdoor installation may include additional sealing and protection, increasing the price.
- Included Accessories: Some boxes come with fusion splice trays, splice tubes, or adapters, which can affect the total cost....
