

Price of 72-core Huijue optical cable

Article Overview

Huijue 72-core optical cables are available in various configurations, with prices typically depending on type, material, and order quantity.

Overview of 72-Core Optical Cables

Huijue 72-core optical cables are designed for high-capacity data transmission, suitable for both indoor and outdoor installations. They come in single-mode or multimode, with options like ribbon fiber for mass fusion splicing or stranded loose tube for rugged outdoor use, providing high bandwidth and long-distance transmission capabilities . Some models integrate power wires for hybrid photoelectric applications .

Price Considerations

The price of a 72-core Huijue optical cable varies based on several factors:

- Cable type: Single-mode cables generally cost more than multimode due to longer transmission distances and lower signal loss .
- Outdoor vs indoor: Outdoor cables with PE or polyurethane jackets for UV and moisture protection are priced higher .
- Hybrid or composite cables: Cables combining fiber with power wires or photoelectric components are more expensive than standard fiber-only cables .
- Length and quantity: Bulk orders or longer cable runs reduce per-meter cost, while small orders may have higher unit prices
