

Price of 96-core optical fiber cross-connector

Article Overview

The price of a 96-core optical fiber cross-connect cabinet typically ranges from \$400 to \$1,200 depending on material, design, and features.

Price Factors

The cost of a 96-core optical fiber cross-connect cabinet varies based on several factors:

- **Material:** Cabinets are commonly made from SMC (Sheet Molding Compound) or stainless steel, with SMC generally being more cost-effective and stainless steel offering higher durability and corrosion resistance .
- **Protection Level:** Outdoor cabinets often have IP65 protection, making them waterproof, dustproof, and resistant to extreme temperatures, which can increase the price .
- **Design and Mounting:** Options include wall-mounted, pole-mounted, or ground-mounted cabinets. Double-sided operation or additional fusion trays can also affect cost .
- **Functionality:** Cabinets may include fusion-integrated modules, adapter trays, cable grounding, and storage for excess fiber, which add to the price .
- **Brand and Supplier:** Prices vary by manufacturer and region. Suppliers like Sun Telecom, SEESUO, ADCfiber, and Fibconet offer different configurations and quality standards
