

Price of Dedicated Drag Chain Optical Cable

Article Overview

Dedicated drag chain optical cables typically range from \$5 to \$50 per meter depending on core count, shielding, and customization.

Overview

Drag chain optical cables are specialized fiber optic cables designed to endure continuous bending, flexing, and abrasion in industrial automation systems, CNC machines, robotics, and production lines . They often feature shielding, multiple cores, chemical and oil resistance, UV protection, and high tensile strength, allowing them to withstand millions of bending cycles without signal degradation . These cables are available in various core counts, lengths, and protective sheaths, which directly affect pricing.

Price Range

- Standard 12-core shielded drag chain fiber optic cables: approximately \$5-\$15 per meter for bulk or stock items .
- High-performance or custom cables with enhanced chemical resistance, PUR sheathing, or high-speed drag capabilities: \$20-\$50 per meter .
- Additional costs may include shipping, customs, or express delivery for samples or small orders. Suppliers often provide free samples of 10 meters for evaluation, with shipping fees deducted from the final invoice
