

Price of Fire-Resistant and Energy-Saving Cable Trays

Article Overview

Cable tray prices vary by type, material, and features, with fire-resistant and energy-saving trays typically ranging from \$20 to \$200 per meter depending on specifications.

Fire-Resistant Cable Trays

Fire-resistant cable trays are designed to maintain cable integrity during a fire, often using intumescent pads, fireproof pillows, or reinforced glass cloth coatings that expand to seal gaps in walls or floors. Common types include:

- Ladder Trays: Strong, durable, open design for heavy-duty cables; excellent airflow reduces heat buildup. Ideal for industrial plants and power distribution systems.
- Solid Bottom Trays: Fully enclosed base protects cables from dust, water, and chemicals; suitable for chemical plants, food processing, and outdoor installations.
- Perforated Trays: Balance between protection and ventilation; used in commercial buildings and HVAC systems.
- Channel Trays: Compact U-shaped design for small bundles of control or instrumentation cables; ideal for retrofit projects and tight spaces. Materials: Steel (galvanized or stainless), aluminum, and fiberglass reinforced plastic (FRP). FRP is fire-resistant, corrosion-proof, non-conductive, and ideal for high-voltage or harsh environments. Price Range:
 - Ladder trays: \$50-\$150 per meter
 - Solid bottom trays: \$80-\$200 per meter...
