

Price of Fireproof and Resistant Cable Trays

Article Overview

Fireproof and fire-resistant cable trays typically range from \$20 to \$150 per meter, depending on material, fire rating, and load capacity.

Price Overview

The cost of fireproof and fire-resistant cable trays varies widely based on material type, fire rating, and mechanical specifications:

- **FRP (Fiber Reinforced Polymer) Cable Trays:** These are corrosion-resistant, lightweight, and fireproof, often used in chemical plants or outdoor installations. Prices generally range from \$40 to \$120 per meter, depending on resin type, fire retardant additives, and load capacity .
- **Galvanized Steel or Aluminum Trays:** Standard fire-resistant trays made of steel or aluminum with powder coatings or intumescent layers typically cost \$20 to \$80 per meter. Higher fire ratings or specialized coatings can push prices toward the upper end .
- **Hybrid or Coated Trays:** Trays combining steel strength with fire-retardant coatings or aluminum alloys may cost \$60 to \$150 per meter, reflecting enhanced fire resistance, durability, and compliance with strict codes .

Factors Affecting Price

- **Fire Rating:** Trays certified for 2-hour or 4-hour fire resistance are more expensive due to additional materials and testing requirements
