

Price of Optical Cable Anti-slip Module

Article Overview

Optical Cable Anti-slip Modules typically range from \$50 to \$200 per unit, depending on fiber count, type, and vendor.

Overview

Optical Cable Anti-slip Modules are designed to secure fiber optic cables within panels or cassettes, preventing slippage and maintaining reliable connections. They are commonly used in data centers, enterprise networks, and telecom installations and are compatible with LC, SC, and MPO/MTP connectors . These modules may come in singlemode or multimode configurations and can support varying fiber counts, often up to 864 fibers in high-density systems .

Pricing Factors

The price of an anti-slip module depends on several factors:

- **Fiber Count:** Modules with higher fiber capacity generally cost more.
- **Connector Type:** LC, SC, or MPO/MTP compatibility can affect pricing.
- **Vendor and Brand:** Established brands like CommScope or FS.com may charge a premium for quality and reliability .
- **Additional Features:** Some modules include monitoring capabilities, splitters, or xWDM functionality, which can increase the cost .
