

Price of Shallow-buried optical cables

Article Overview

Shallow-buried optical cables typically range from \$0.13 to \$6 per foot depending on fiber count, armoring, and installation method.

Price Ranges by Cable Type and Fiber Count

- Single-mode fiber (1-12 strands): \$0.10-\$1.00 per foot for the cable itself, with lower costs for simple FTTH drop cables (\$0.13/ft) and higher costs for backbone cables (\$1/ft) .
- Multimode fiber (12-24 strands): \$0.30-\$1.50 per foot, with higher strand counts increasing the price proportionally .
- High-count backbone cables (up to 288 fibers): \$5-\$6 per foot, often armored and gel-filled for direct burial in shallow trenches .

Construction and Protection Features

- Armored cables: Steel tape or rodent-resistant armor adds \$0.50-\$5 per foot, essential for shallow burial in areas with high soil compression or rodent activity .
- Water-blocking gel or dry-blocking: Included in most direct-burial cables to prevent moisture ingress, slightly increasing cost .
- Micro-trench or shallow-burial designs: Typically installed at 10-30 cm depth, using thin armor or flexible jackets to reduce installation difficulty and cost .

Installation Considerations

- Direct burial vs conduit: Direct burial is common for shallow installations and redu...
