

Price of T-shaped Vertical Cable Tray

Article Overview

Vertical T-shaped cable trays are available starting at approximately \$0.95 per unit, with prices varying based on material, size, and finish.

Vertical T cable trays are designed for efficient vertical branching of cables in industrial and commercial installations, supporting heavy cable loads and ensuring organized cable management . They are typically made from galvanized steel or aluminum, offering durability and corrosion resistance, and are available with powder-coated or hot-dip galvanized finishes for additional protection . Pricing depends on several factors:

- **Material:** Steel trays are generally more affordable than aluminum or stainless steel options.
- **Size and load capacity:** Larger trays or those designed for heavier cables cost more.
- **Finish:** Powder-coated or hot-dip galvanized finishes may increase the price.
- **Supplier and quantity:** Bulk orders or wholesale suppliers like Alibaba offer lower per-unit prices, starting at \$0.95 per unit for basic vertical cable trays . These trays are compatible with various cable tray systems, making them suitable for data centers, power distribution systems, and industrial facilities . For precise pricing, it is recommended to request a quote from suppliers like Kim Long Trading, McMaster-Carr, or Alibaba, specifying the material, dimensions, and finish required. By considering these factors, you can select a T-shaped vertical cable tray that balances cost, durability, and installation requirements for your project.
