

Price of Wiring Arrangement for Home Electrical Distribution Boxes

Article Overview

The cost to wire a typical residential distribution box ranges from \$450 to \$1,800, depending on panel size, amperage, wiring complexity, and labor.

Distribution Box Costs

Residential distribution boxes, also known as breaker panels or electrical panels, serve as the central hub for power distribution in a home. Standard indoor panels for single-family homes typically cost between \$150 and \$1,500, including materials and installation, with most projects falling in the \$450-\$1,500 range for 100-125 amp services with standard wiring and breakers . Premium setups, such as 200+ amp outdoor weatherproof panels with extensive wiring and specialty breakers, can cost \$2,800-\$4,000 .

Wiring Costs

The wiring that connects the distribution box to outlets, switches, and appliances is a significant portion of the total cost. For new residential construction, wiring costs typically range from \$4 to \$9 per square foot, depending on home size, layout complexity, and wire quality . For example, a 1,500 sq ft home may cost \$6,000-\$13,500 for complete wiring, while a 3,000 sq ft home could range from \$12,000-\$27,000 . Rewiring an older home is generally more expensive due to labor-intensive work to update existing circuits and meet current code requirements
