

Price of a three-level electrical distribution box on a construction site

Article Overview

The price of a three-level electrical distribution box for construction sites typically ranges from \$200 to \$800, depending on specifications, amperage, material, and customization.

Factors Affecting Price

- **Rated Current and Amperage:** The main switch rating (e.g., 63A, 100A) directly affects cost. Higher amperage boxes are more expensive due to larger components and copper wiring capacity .
- **Material and Build Quality:** Boxes made of stainless steel or robust sheet steel are more durable and weather-resistant, which increases the price compared to basic thermoplastic enclosures .
- **Number of Circuits and Sockets:** Additional industrial sockets, waterproof outlets, or terminal blocks increase cost. Pre-wired boxes with multiple circuits are more expensive than basic models .
- **Customization and Safety Features:** Features like built-in circuit breakers, energy meters, IP65/IP67 protection, and compliance with IEC standards can raise the price .
- **Installation and Delivery:** Some suppliers include shipping and installation in the price, while others charge separately. Bulk orders may qualify for discounts .

Typical Price Range

- **Basic three-level distribution box:** \$200-\$350, suitable for small tools and temporary lighting....
