

Price of cable tray installation for space frame structures

Article Overview

Cable tray installation costs typically range from \$20 to \$50 per meter, depending on material, tray type, installation complexity, and height, with space frame structures often increasing labor and coordination expenses.

Material and Tray Type Costs

The cost of cable trays varies significantly based on the material and design:

- Steel trays: \$5–\$25 per meter, widely used for strength and cost-effectiveness .
- Aluminum trays: Lightweight and corrosion-resistant, slightly more expensive than steel .
- Fiberglass trays: Durable and non-conductive, often used in industrial or corrosive environments .
- Stainless steel trays: Highest cost, ideal for harsh or outdoor conditions . Tray types such as ladder, perforated, or solid-bottom also affect pricing, with ladder trays generally costing more due to higher material and support requirements .

Labor and Installation Complexity

Labor is a major cost driver, especially for space frame structures:

- Height and accessibility: Elevated or hard-to-reach installations require scaffolding, lifts, or additional safety measures, increasing labor costs
