

Price of fiber optic cable installation for pole erection

Article Overview

The standard cost of erecting fiber optic cable on poles (aerial installation) typically ranges from \$8 to \$12 per foot, or approximately \$40,000 to \$60,000 per mile, depending on terrain, labor, and make-ready requirements.

Cost Overview

Aerial fiber installation is generally less expensive than underground deployment because it avoids trenching and conduit work, making it faster and more cost-effective, especially in rural or sparsely populated areas . The cost per mile for aerial fiber ranges from \$15,420 to \$33,106, with variations based on pole ownership, permitting fees, and terrain . On a per-foot basis, typical costs are \$8 to \$12, which includes fiber materials, labor, pole attachments, and splicing .

Key Cost Drivers

- **Make-Ready Costs:** Preparing existing utility poles for new fiber attachments can significantly impact costs. This includes engineering, rearranging existing cables, and obtaining permits .
- **Labor Rates:** Crew rates vary by region and contractor skill, typically ranging from \$75 to \$180 per hour, with total labor hours depending on route complexity and access .
- **Terrain and Environment:** Rural areas with fewer obstructions are cheaper, while urban or mountainous regions increase costs due to more complex pole access and...
