

Price of fiber optic communication equipment subframe

Article Overview

Fiber optic subframe prices typically range from \$500 to \$10,000 depending on type, capacity, and specifications.

Fiber optic communication subframes, such as the U16 business subframe for OSN9800 systems, are available from suppliers like Alibaba, with prices varying based on configuration, manufacturer, and order quantity . Rack-mount subframes for PLC fiber splitters, designed for standard 19-inch cabinets, are commonly used in FTTH deployments and carrier-grade networks, with 1U or 2U height options and high-quality metal housing . For general budgeting, new fiber optic equipment subframes can cost \$500 to \$10,000, depending on performance, durability, and features, while used or refurbished units may range from \$200 to \$5,000 . Wholesale suppliers offer factory-direct pricing for bulk orders, which can reduce per-unit costs significantly . Factors affecting price include:

- Capacity and configuration (e.g., 1×16 to 1×64 splitters)
 - Connector type (SC/APC, SC/UPC)
 - Material quality (cold-rolled steel housing, mechanical protection)
 - Compatibility with standard racks and ODF frames
 - Performance metrics such as insertion loss and return loss
- When planning purchases, consider whether the subframe is for small access points, central office aggregation, or large-scale FTTH deployment, as this impacts the required specifications and cost . For precise pricing, contacting suppliers directly or requesting a quote is recommended, especially for bulk or customized orders.
