

Price of fiber optic splice closures in Ukraine

Article Overview

Fiber optic splice closures typically cost between \$80 and \$300 per unit, depending on type and capacity, with local pricing in Ukraine potentially varying due to shipping and market factors.

Price Range and Factors

The cost of a fiber optic splice closure depends on several factors:

- Type of closure: Inline, dome, wall-mount, or aerial closures have different price points. Buried dome closures are generally more expensive than wall-mounted or aerial types .
- Fiber capacity: Closures designed for higher fiber counts (e.g., 144 fibers) are more expensive than smaller 12-fiber closures .
- Material and quality: Closures made from high-quality materials with robust sealing and environmental protection cost more .
- Supplier and location: Prices may vary in Ukraine depending on local distributors, import duties, and shipping costs. International suppliers often list closures in the \$80-\$300 range, which can serve as a reference .

Additional Considerations

- Labor and splicing costs are separate. Fusion splicing labor typically ranges from \$50 to \$150 per splice, and OTDR testing may be an additional cost
