

Price of installing drop fiber optic cable

Overview

A short residential drop under 1,000 ft may cost \$3,000-\$8,000, while longer runs to an attached garage or street node can run \$8,000-\$25,000. For full property installations with underground trenching, conduit, and handoffs to internal networks, costs commonly fall in. Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. You should account for permit. Homeowners and businesses typically pay for fiber optic cable installation based on distance, conduit needs, and labor. The main cost drivers include material type, run length, trenching or aerial work, and any required permits or inspections.
